

## Tin Ceiling Terminology

- A - The Field Panel is the design of the main panel in the room. This panel may cover the entire ceiling or be centered in the room, as shown in the sketch above.
- B - A Molding Strip may be used to enhance the appearance of the ceiling. It is installed between the field panels and the filler panel.
- C - The Filler Panel is a panel with a simple over-all design such as a "hammered" or "dimpled" finish. This panel is used to center the Field Panel in the room.
- D - The Cornice is applied to the corner of the wall and ceiling. It can be one of our metal cornices or your own choice such as stained wood.
